

# Risk Intelligence Assessment

## How Safe is Your Data?

Your business is **unique**. It has many moving parts. Information is the lifeblood. Data is constantly in motion and business requires more extensive sharing than ever. External agents, bad actors, and careless employees are constantly nibbling away at the cybersecurity controls you have in place and misusing your intellectual property. Social media, cloud services, and an explosion of mobile devices further fracture your ability to protect sensitive data. **You're losing control.**

## Regain Control with Risk Intelligence

**Clearly see security weakness and fix it.** WaveGard's Risk Intelligence is a comprehensive security assessment that **empowers** you to defend data against sophisticated cybersecurity threats. Risk Intelligence brings situational awareness and clarity to your exposure level. Our recommendations and mitigation roadmap show you where to **focus** your efforts to enhance your data's protection.

Our process is highly detailed and the results show. We begin by listening and understanding how you do business. Next, WaveGard's team of industry experts performs a deep dive on your information security program, key IT assets, cybersecurity components, and processes. Risks are **thoroughly analyzed** and reporting is specific. Management Teams benefit from our higher level abstracted findings while Technical Teams get the best practice specifics they need for **smart mitigation**.

## Ready to take back control?

At WaveGard, we **empower** YOU to defend your sensitive data and systems against sophisticated cybersecurity threats. Our passion is to build an amazing relationship, earn your respect, and become your **trusted cybersecurity advisor**,
