

Cybersecurity Advisory Services

The Power of Partnership

Building an **effective Cybersecurity Program** is daunting... While you are busy handling the day-to-day demands of the business, complex Information Technology and Cybersecurity (ITaC) controls, written standards, customer demands, regulatory requirements, and ever changing technologies all vie for your attention. It can be overwhelming and hard to know where to start. **You need a plan and an experienced partner** to help you along the way.

Your Trusted Cybersecurity Advisor

In the rapidly changing, software driven world of cybersecurity WaveGard has taken a more personal, long-term view of our client relationships. We take the time to listen and understand your business' unique requirements. We work collaboratively with your team to identify the areas most in need of improvement and we develop customized and achievable goals that align with your business. Specifically, we will:

- Review the production environment and **identify pressing IT and cybersecurity goals and requirements.**
- Develop an **IT & Cybersecurity Strategic Plan**, critical to long term budgeting and planning.
- Prioritize critical projects and **work collaboratively** with the team to **successfully complete** these objectives.
- Track key tasks and **report on progress.**
- **Regularly review and update the** current tasks, deadlines, and areas of focus to address shifting priorities.
- **Flexibly scale engagements** based on projects, budgets and needs.

How to Begin?

It's easy! Let's start with a simple discussion. We want to understand the **IT and cybersecurity goals** your organization is seeking to achieve and define **how quickly** you need to get there. After that, we will provide a statement of work (SOW) outlining our approach along with the expected level of effort. Rest assured, WaveGard SOWs are pre-approved blocks of hours that are only invoiced as the hours are expended. **No pre-paying or retainers required!**

Ready to Supercharge Your Security Program?

At WaveGard, **we empower YOUR TEAM to boldly defend your sensitive data and systems** against sophisticated cybersecurity threats. Our passion is to build an amazing partnership, earn your respect, and truly become your **trusted cybersecurity advisor.**

Ready to start? Contact us at www.wavegard.com or email us at consulting@wavegard.com.

Cybersecurity Advisory Services Provide:

- ✓ Consistent, ongoing attention to cybersecurity.
- ✓ A shared vision driven by long term improvements, not transactional services.
- ✓ Clarity on how to achieve complex ITaC goals over time.
- ✓ Deep knowledge of enterprise IT and cybersecurity.
- ✓ ITaC mentoring for your in-house team.
- ✓ Clear, concise communication tailored to both leadership and ITaC practitioners.
